

# European Union Health Policy

François Briatte

Fall 2021

This course is about the politics of health care and public health in the European Union (EU). Its sessions will touch upon the funding and organisation of health systems and policies in Member States, and focus on how the European Union intervenes in areas such as health services, public health or pharmaceutical regulation.

By design, this course will ask some of the same questions that are found at the centre of policy studies: Why do national decision-makers adopt different policies, or make different progress towards common goals? How are these policies affected by the European Union, and what are the political forces, institutions and ideas that shape their formulation?

Insights about the history and politics of the EU and European welfare states, as well as ideas and concepts from health economics and epidemiology, will provide helpful background in answering these questions. No previous knowledge in any of these domains is required for taking the course, but curiosity in all of them will prove useful.

Students interested in **Global Health** — The Global Health course is not on offer this year, but this course has several sessions and presentations that overlap with it. Check, in particular, Sessions 7 (Tobacco), 8 (Markets) and 9 (Austerity), and the presentations attached to those.

## Coursework

This course is 50% lecture-based, 50% presentation-based. The **16 presentations** listed in the next pages will be assigned to groups of two or three students, with each student having to present at least twice over the entire course. Each presentation lists two readings, which you should read in detail and present to the class in the form of a 15-minute talk.

Presentations are worth 80% of your final grade, the other 20% being attendance and participation from the entire class. Instructions on how to deliver presentations will be provided in Session 1. Unannounced absences on presentations will result in a grade of 0/20. Students enrolling late in the course might be assigned policy memos instead. All other School regulations naturally apply.

All other readings listed in this syllabus will be either briefly mentioned or covered in detail during the lectures at the beginning of each class.
